Fiber Cut, Kern County (New/Final)

On 10/25/17 at 1758 hours the California States Warning Center (CSWC) was notified by the Cal OES 911 Branch of a partial community isolation that began at 1515 hours in the McFarland, Taft and Glenville areas of Kern County.

- A Fiber Cut/Damaged Fiber affecting an OC 12 circuit in McFarland impacting parts of the McFarland, Taft and Glenville areas in Kern County.
- The outage affected 1,805 lines.
- McFarlane PD's 911 calls were answered by Kern County Sheriff.
- Cellular 911 service in the outage area was unaffected.
- The CSWC made all notifications per SOP.

As of 10/25/17 at 2221 hours:

- Frontier located the outage approximately 10 miles outside of McFarland. The cut fiber runs between Buttonwillow and McFarland.
- When the excavation crew arrived on site a few moments ago at the fiber cut location, the crew found two detour sign posts that were placed earlier today along the side of the road.
- One detour post was found placed in line with the fiber marker identifying the buried fiber cable underground, the other detour sign was not in the path.
- Citizens in the affected area still had cellular 911 service and Kern County Sheriff continued to take McFarland PD's 911 calls.

As of 10/26/17 at 0311 hours:

- The repair crew excavated the broken fiber and confirmed the damaged fiber.

As of 10/26/17 at 0556 hours:

- The fiber cable cut was repaired on 10/26/17 at 0512 hours and service was restored to all 1805 lines in the communities of McFarland, Taft, Glenville and at McFarland PD.
- All 911 Services have been restored back to normal operation and McFarland PD is in the process of taking their 911 calls back from Kern County Sheriff.

WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

*** Dry, unseasonably warm for the next week ***

*** SPECIAL NOTE: Beginning Sunday, 10/29/17, this product will be updated Monday-Friday. Updates will be provided on weekends only if major fire operations develop. ***

High pressure will generally govern the weather pattern over the region through late next week with dry, unseasonably warm weather continuing. Winds will be quite light for most areas into next week. However, for the next few nights, some light to locally moderate N winds will occur over the northern Sacramento Valley and western foothills that will keep Relative Humidity (RH) recovery fairly low in some locations and/or overnight temperatures mild. Gusty NE to E winds will develop locally along the western slopes and drainages of the Cascades and Sierra with a few wind-favored areas seeing gusts of 25-35 mph overnight into the mornings.

Afternoon high temperatures will continue to be 15-20 degrees above normal for some days yet with the warmest inland areas still in the in the lower 90s today followed by a very gradual cooling trend through the weekend and next week. Afternoon low RH values will generally be 12-25%. The poorest overnight RH recoveries will be 20-40% in the hills around the Sacramento Valley and at some mid and upper slope locations. A shallow marine layer and light onshore flow will provide for higher RH and some periods/areas of fog or low clouds along the immediate coast, especially north of Cape Mendocino.

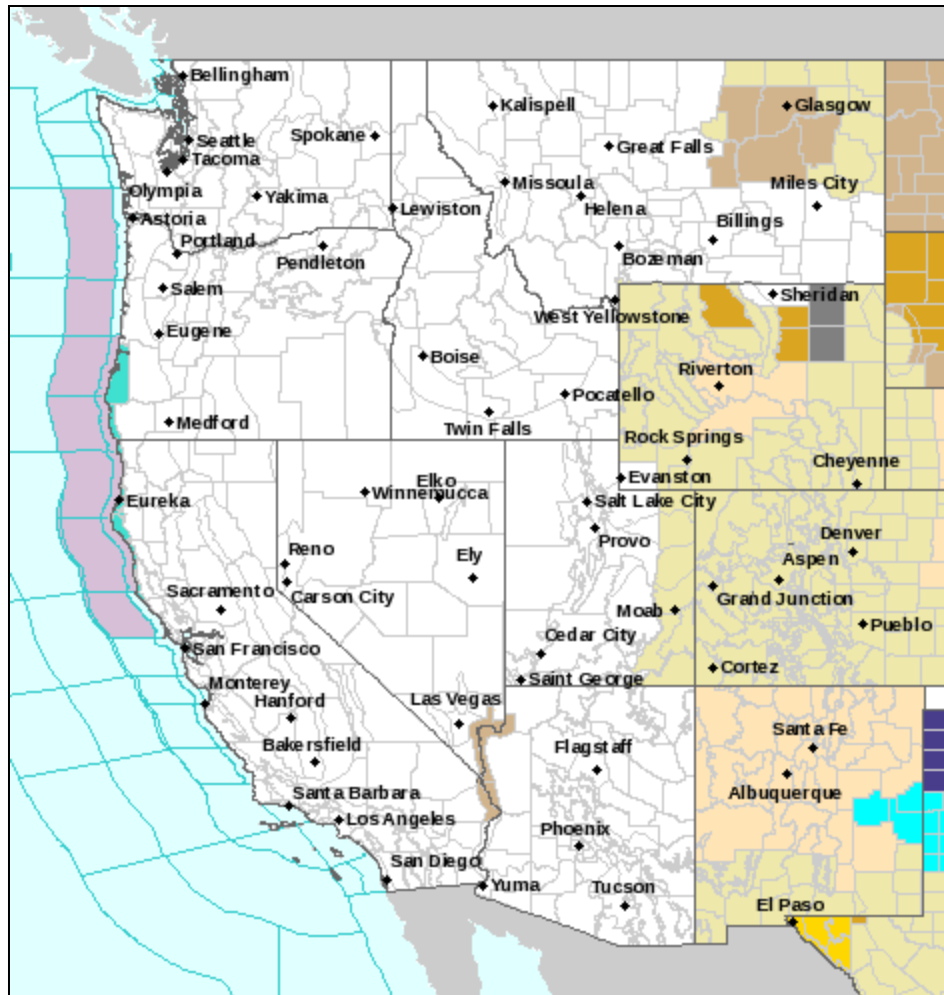

SOUTHERN CALIFORNIA

Continued very warm and dry through Saturday

The area of high pressure that was over California has weakened and is now allowing the region to cool down after several days of record heat. However, daytime highs will still be above normal with 70s in the mountains and 80s to low 90s in the valleys. With a return of onshore flow, there will be some modest humidity recovery along the coast and to a lesser degree over the inland areas. Winds will generally be variable 5 to 15 mph. High pressure will remain over California Friday and Saturday with weak surface offshore flow developing. Temperatures will change little throughout the district and there will be some local northeast winds of 10 to 20 mph below the canyons and passes of Southern California during the morning hours both days. A weak area of low pressure will quickly move through the region Sunday and Monday which will help bring more seasonable weather to the district. Onshore flow will increase and the marine layer will become more influential across the coastal areas during this time. More substantial cooling may be in the offering by the middle to end of next week.
